

# Updated GBGH Timer

# Overall Website Look

Title	
Settings/FAQ	Statistics

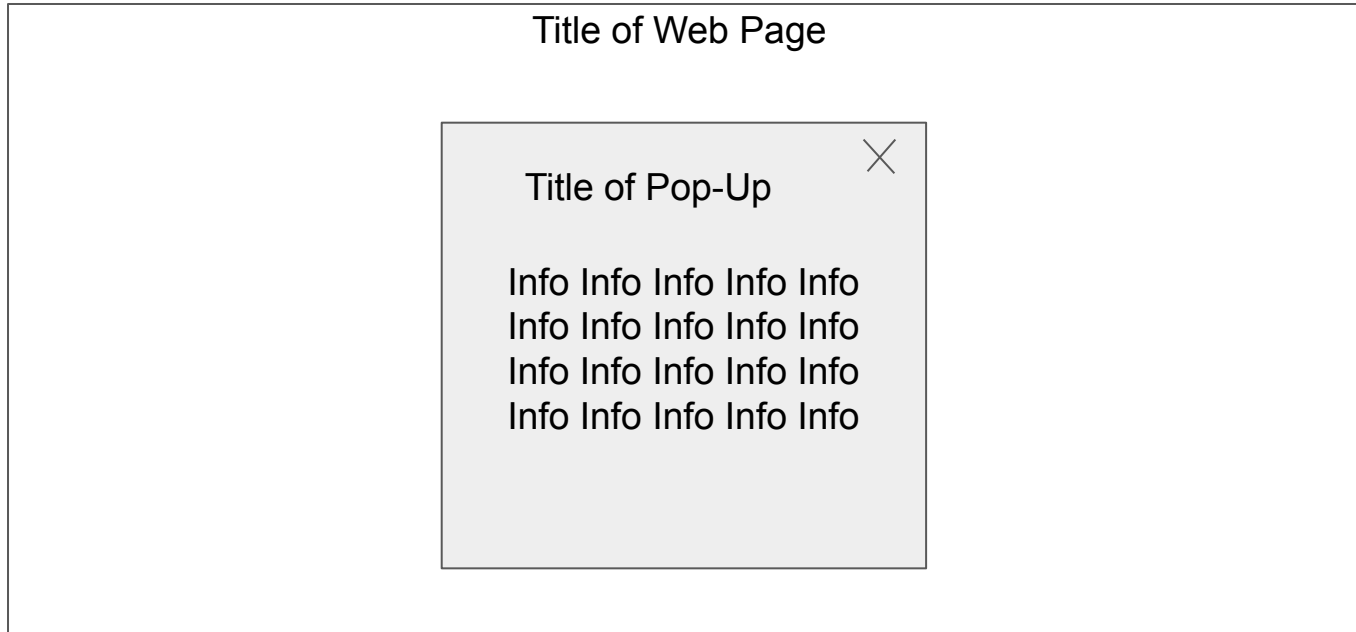

Task: Default Task (Button 1)

15: 00  
(# of current pomo)

Start/Stop

# On click of Setting/FAQ or Statistics

Same webpage, but with pop-up. I'm not too good w art but something along:

On Click of Tasks Button (It's not orange, also label of button is name of current task)

Again Artwork not great, but on button press the pop-up is this

Title of Webpage

Task List: ✕

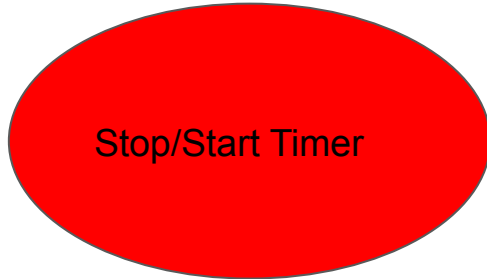

Tasks	Pomos
Get Big	Infinite
Get Small	Negative
Get Ideal	7

Add Task

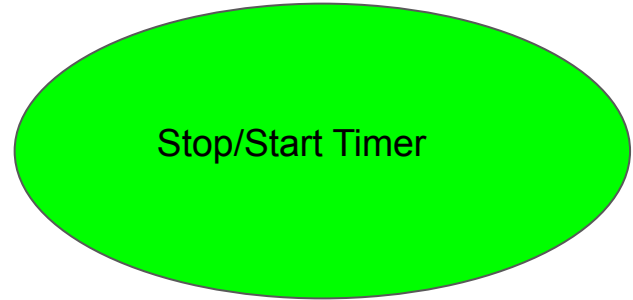

# Stop/Start button

Turns green if hovered over, pretty much it

Before Hover Over

Before Hover Over

# Overall

1. Website will have 2 buttons on a nav bar (Settings/FAQ and Statistics), both of which (on-click) produce pop-up on page in similar style as slide 3
2. Website will have button next to task to display current task to user and to allow the user to open up the current task list. Opening up this task list gives user nice table of already inputted tasks as well as option to add new task/s.
3. Website will have normal timer with # of pomos under to help user see where they are with their current task
4. Website will have a Start/Stop button at bottom that changes color on hover
5. Finally, Website will have title on top
